

Matobev Option A Launch Budget (Kenya)

Prepared: 2026-08-20 | Currency: Kenyan Shillings (KES) | FX assumption: 1 USD = KES 130
Scope: First-time production launch with user onboarding live on iOS and Google Play, plus AI service deployment.

Payee	Cost Item	Frequency	Amount (KES)	What It Enables
eCitizen (Government of Kenya)	Business name registration	One-time	950	Creates legal business identity for operating, invoicing and contracts.
Domain registrar (e.g., Truehost/HostPinnacle)	.com domain (1 year)	Annual	1,800	Public domain for legal pages, links, support and trust signals.
Apple	Apple Developer Program	Annual	12,870	Required to publish and maintain the iOS app on App Store.
Google	Google Play Console account	One-time	3,250	Required to publish the Android app on Google Play.
Supabase	Backend database/auth/storage	Monthly	0	Core backend for users, auth, profiles, messaging and app data (Free tier at launch).
Render or Railway	AI service deployment (inference API)	Monthly	3,250	Hosts the AI pipeline service so uploaded videos can be processed for ratings.
		One-time subtotal	4,200	
		Annual subtotal	14,670	
		Monthly run-rate	3,250	
		Estimated first-year total	57,870	

Note: Supabase Free is listed for launch cost control. Upgrade to Supabase Pro once traffic, storage or database limits are approached.

Note: AI deployment is costed for a baseline always-on inference API. Heavy video load may require higher compute tiers.
